

## 2025: Danger Zone

<https://www.youtube.com/watch?v=eVjLs-Y8myM>

I'm aware that this may be deemed a 'threat', with me saying I am going to target you in 2025, so I want to reassure you first of all that that is not the case. I am not a violent person and never have been, and I have no intentions of coming to Ulverston or knocking on your door. That is not what I am suggesting by sending you these images.

I want you to know however that I have you in my sights, and that I wield power, a formidable power, and with that power I am going to take you down without any violence and probably without even meeting you.

I also want you to know that I know what you have done to Sharon, the fact that you passive-aggressively use threat, menace and intimidation to control her, the fact that you use that threat and control to f\*\*k her, the fact that you control her and do everything you can to destroy any real relationships she may have. You are a rapist thug Ian, and I hope Sharon has the courage to stand up to you and act in 2025 to finally give you the boot, and I want you to know this: if she ever invites me up to deal with you, I will be there that day or the next, and I will deal with you. Now I'm not interested if you huff and puff and issue a whole stream of macho bullshit my way by way of email or psychic vibes, I won't respond to any of that. The only thing I will respond to is Sharon, and if she ever asks me to come up I will be there that day or the next and I will deal with you.

It is important to me that you know that.

You are in my sights Ian, and I will not let you get away with what you have done to both Sharon and me, and no doubt others, and I want you to know that I won't stop there either: I will make sure that you are not able to do the same to any woman ever again.

And I repeat: I will do so without the use of physical violence. I am not threatening physical violence. It is important to me that you understand that as I don't want to create threat, menace or anxiety. That is not my way.

Sonny
